CoralCare

• PROTECT REEFS, ENJOY RESPONSIBLY •

By involving users in the production process—utilizing natural coastal coconut resources to create reef-friendly sunscreen paste—we aim to encourage the use of eco-friendly sunscreen and reduce the environmental impact on coral reefs.

At the same time, this addresses common user pain points regarding the inconvenience of carrying sunscreen or forgetting to apply it.

INSPIRATION

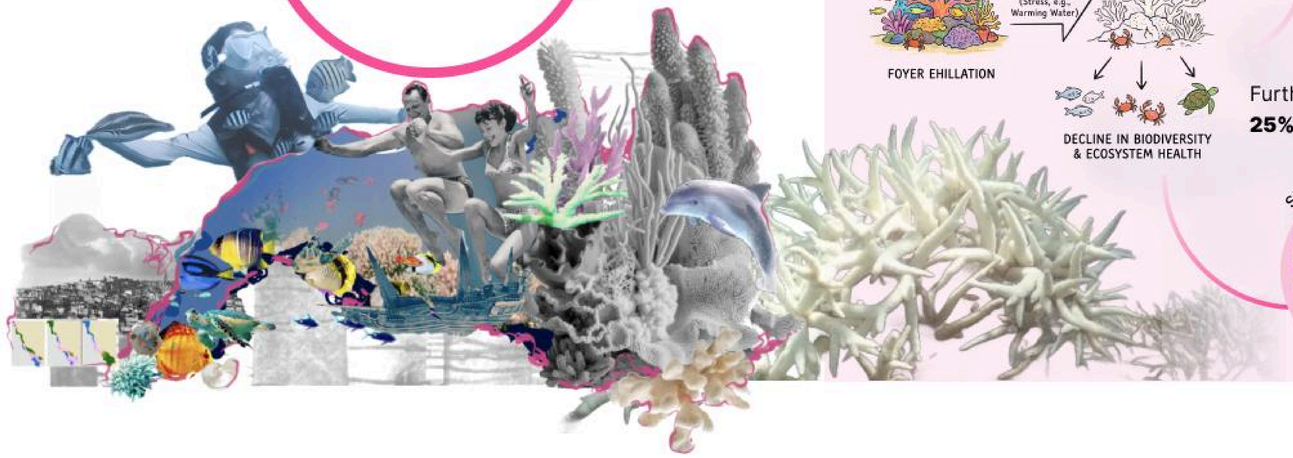

During a tropical island trip, I noticed more tourists wanting to dive but overlooking how their sunscreen harms corals and causes bleaching. I hope to encourage awareness and the use of coral-safe sunscreen.

Human Tourism Activities

Coral Bleaching

RESEARCH

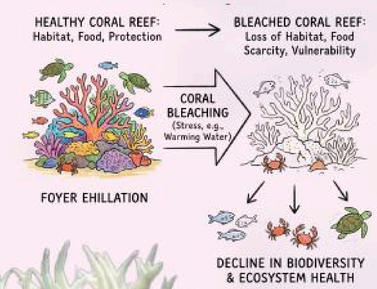

Sunscreen protects tourists visiting the beach, but also harms coral reefs in the sea.

Human Tourism Activities Contributes To The Ocean Pollution

150 Million - 300 Million Tons Of Marine Plastic Debris In Total, 90% Sunscreen Packaging Is Made Of Plastic

70% Of Sunscreen Products Are Harmful To Coral.

Further affects about **25%** of marine life such as flounder

10% Unkown

Only 20% Of Sunscreens Are Coral-Safe.

- Mineral-based & non-toxic.
- Water-Resistant & Less Run-Off
- Natural, Non-Nano Minerals

Mineral sunscreen are also highly recommended to eliminate pollution at its source.

Other Efforts Have Been Made To Reduce The Environmental Impact Of Sun Protection.

In Palau, sunscreens containing certain **chemicals** are **strictly prohibited**, and areas **showing signs** of coral bleaching are also protected.

STAKEHOLDERS

TRANSFER TOURISTS NEEDS TO PROTECTION EXPERIENCES

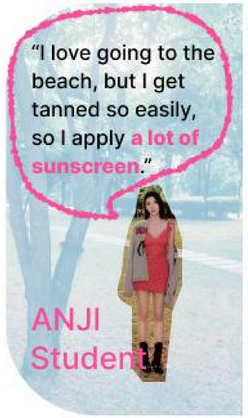

I have listed the stakeholders who contribute to the sunscreen pollution of corals caused by travelers and the relationships among them to find out service opportunities.

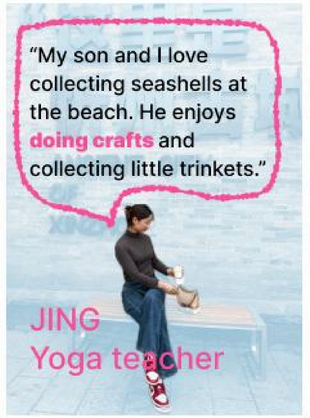

Project Value

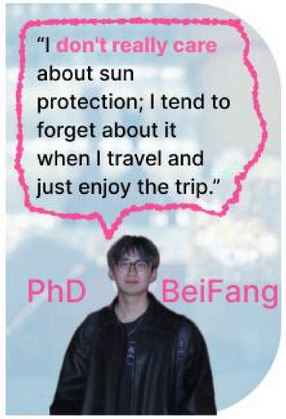

- Directly **convey the knowledge** of marine conservation/coral protection experts to tourists through travel
- Provide a unique **travel activity** for travel agencies, which caters to the experiential needs of non-charitable travelers.
- Achieve multi-stakeholders' benefits while reducing the burden of government publicity.

• Users' Interview

• Key Stakeholders' View

"Many tourists come here wanting to go diving to see the coral. Most of our travel agencies offer **similar beach activities**, but tourists often choose us because we **provide extra sun protection**."

Diving instructor KEN

Shop assistant Locals

"We Malaysians don't really need sunscreen anymore, we're used to it. If it's really sunny, we usually **use physical sun protection**."

Tourists Pay More Attention To The Travel Experience Than Coral Conservation.

When Choosing A Sun Protection Method, People Are More Concerned With Its Effectiveness And Portability Than Its Environmental Friendliness.

JOURNEY MAP

Pains — Findings

Preparation

Sunscreen exceeding 100ml cannot be taken on airplanes.

My luggage was packed with supplies.

Sunscreen 喷雾 might not pass security check.

Various search local activities

Social Media APP

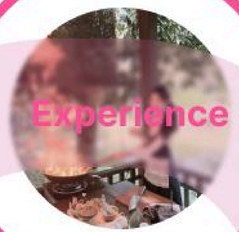

Many activities are canceled after registration due to weather, especially at the beach. Even if you get a refund, there's nothing to do afterwards.

Memories

There is a lack of physical objects to carry this memory.

IDEATION

INCORPORATING THE CREATION OF CORAL-FRIENDLY SUNSCREEN MUD INTO THE TRAVEL EXPERIENCE

CASE STUDY

- *Grandma's home cooking school*

Thailand's cooking schools are famous, **allowing tourists to learn and prepare local specialties firsthand.** It is currently extremely popular among **foreign tourists** and bookings are filling up fast.

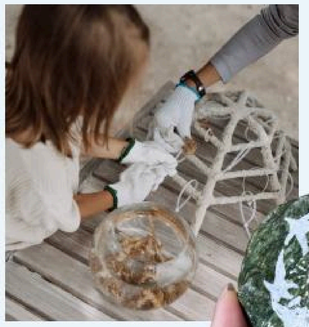

- *Sunscreen Mud DIY*

Some netizens also **make their own sunscreen.**

Hands-on craft experiences attract a large number of tourists, enriching the travel experience and physically extending travel memories.

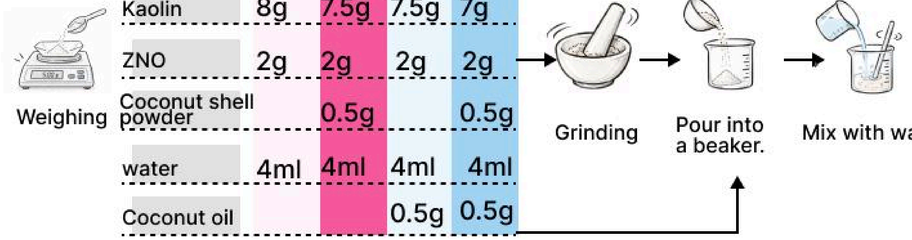

Coconut shells as a unique souvenir, also be used as a **raw material to make sunscreen.**

EXPERIMENT TESTING

	A	B	C	D
Kaolin	8g	7.5g	7.5g	7g
ZNO	2g	2g	2g	2g
Coconut shell powder		0.5g		0.5g
water	4ml	4ml	4ml	4ml
Coconut oil			0.5g	0.5g

CONSUMER EXPERIENCE MAP

DISCOVERY

"I didn't know sunscreen could affect coral reefs."

Discover coral protection

"I want a relaxing vacation."

Find a beautiful beach destination

"Preparing for the beach trip."

Need protection from sunlight

RESERVATION AND PURCHASE

"I am not just buying sunscreen, I am joining ocean protection."

Book a meaningful ocean experience

Plan the trip

Weather at the beach is unpredictable, so contingency plans are necessary.

Consider luggage size and sun protection effectiveness.

Buy a sunscreen product

USER EXPERIENCE

Create + Learn + Protect

"I made my own coral-friendly sunscreen."

Enjoy beach activities

"Great memories with friends."

Apply and forget

"It only protected my skin and is easily washed off with water."

FEEDBACK AND IMPACT

"Whenever I see this sunscreen packaged in a coconut shell, it reminds me to protect the environment even more."

Become an ocean guardian

"The trip was fun, but temporary."

Leave no lasting impact

"I won't use it all, and there's still a long time until my next trip, so I'm worried it might expire."

No emotional connection
